Experience building some of the most popular iOS apps in the world. Looking for a role where I can craft delightful experiences and obsess every detail. US Citizen.

Experience

Threads (Meta) │ Software Engineer

Apr 2023 - Present

Built 0→ 1 features within the iOS app across the main feed, search, profile tab, activity feed, and more.

Leveraged my own product intuition to address power user needs. I closely partnered with our designers, data scientists, and PMs to ensure that we were always on the right track towards creating user value, and could measure it if needed.

Instagram (Meta) │ Software Engineer

Oct 2022 - Apr 2023

Worked on the Reels Creators team. Prototyped and launched full-stack features (using Python, Swift) that helped larger accounts grow their following.

Quizlet │ Software Engineering Intern

Jun 2021 - Aug 2021

Developed a feature using React, TypeScript, and Hack to capture user-submitted feedback after completing a study session. Data helped product leads prepare upcoming projects for better personalization

Skills

Languages

Swift
Objective-C
TypeScript
Python
Hack
SQL

Frameworks

UIKit
SwiftUI
React
Django

Tools

Figma
Cursor

Education

Washington University In St. Louis

Aug 2018 - May 2022

BS Computer Science, Minors in Human Computer Interaction and Biology
